

# Monitoring Procedure Changes

This form will change the standard protocol for the Central Station Dispatch Instructions. Standard dispatch procedure is to call the premise phone number first in an alarm activation, then if no one answers the phone or if the person answering the phone does not provide the correct abort code then the operator will dispatch the police. And will then attempt to contact a representative from the contact list.

The addition of special instructions could result in error or omission and/or improper dispatch. Special instructions are placed on a site's account at your sole discretion. The Central Station reserves the right to change or reword any special instructions before accepting them. All Special instructions are considered outside the Central Stations normal operating procedure.

All high-lighted areas are required.
